

**Retro-Reflective Sensor**  
**Diffuse Sensor**  
**up to 65 m range**

**Detects hot and cold objects extremely secure**

**Retro-Reflective - Diffuse - Cooling Jacket - Fiber Optic - Optics - Reflectors - High Temperature**

Sensing range max.	<b>65 m</b>	<b>65 m</b>	
Operating range	<b>47 m</b>	<b>47 m</b>	
Type of sensor	Retro-Reflective Sensor	Retro-Reflective Sensor	
			
Housing size [mm]	Ø57 x 170	Ø76 x 170	
Housing material	stainless steel	stainless steel	
Type of light	infrared	infrared	
Ambient temperature	up to +70 °C	up to +200 °C (with water cooling)	
Type	<b>LRA 600</b>	<b>LRB 600</b>	
Contamination control	yes	yes	
Notes	The sensing range of the Retro-Reflective Sensor is related to reflector OR 03		

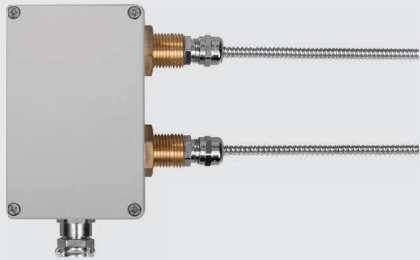

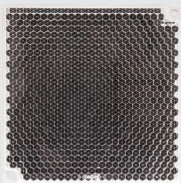

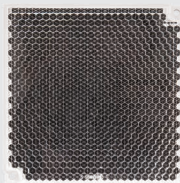

Sensing range max.	<b>6000 mm</b>	<b>6000 mm</b>	
Operating range	<b>4500 mm</b>	<b>4500 mm</b>	
Type of sensor	Diffuse Sensor	Diffuse Sensor	
			
Housing size [mm]	Ø57 x 170	Ø76 x 170	
Housing material	stainless steel	stainless steel	
Type of light	infrared	infrared	
Ambient temperature	up to +70 °C	up to +200 °C (with water cooling)	
Type	<b>LTA 600</b>	<b>LTB 600</b>	
Contamination control	yes	yes	
Notes	The sensing range of the Diffuse Sensor is related to the Kodak Grey card 90 % reflexion		

# Retro-Reflective Sensor / Diffuse Sensor with Fiber Optic Cable

**Proxitron**

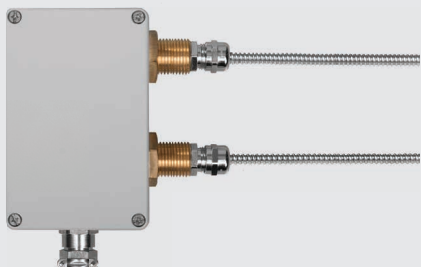

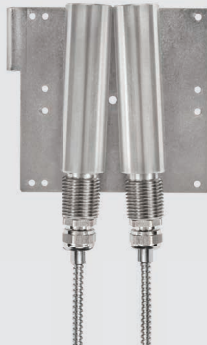

SENSORS MADE IN GERMANY

## Reflectors for Retro-Reflective Sensors

<sup>2)</sup> Lengths 2, 4, 5, 6, 8, 10, 15, 20 m

Proxitron light barriers are outstanding for detecting hot and cold objects. They are not sensitive to exterior light influences and resistant to infrared radiation from other heat sources. This enables them to be used for detection of objects inside furnaces. The high switching speed enables secure monitoring of rapid processes and the extreme range permits the use in most difficult environments. Proxitron has set new standards of operating security and functional reserve. The robust design guarantees secure operation even in cases of vibrations, radiating heat, and high ambient temperatures. The optics consist of temperature-resistant glass that can resist the toughest condition.

In addition to the standard versions featuring stainless steel housing with integrated electronics, there are variations with cooling jacket housing for temperatures up to 200 °C available. Furthermore versions with fiber optic cable, separate evaluation system and separate optics that are able to withstand ambient temperatures up to 600 °C are also part of the product range. A contamination control enables early signalling of unstable operating conditions. Several connection variations, an optional air purge, and matching accessories round off the series.

- **detection of hot and cold objects**
- **max. range 65 m**
- **ambient temperature up to +600 °C**
- **extremely fast (1 ms/ 1000 Hz)**
- **extremely high functional reserve**
- **robust stainless steel housing**
- **simple LED signalling**
- **optics and fiber optic cables for hot areas**
- **contamination control**
- **diverse connections, outputs, and operating voltage variations**
- **several accessories**
